Compuware ISPW Filter Unavailable Order by Loading. Date Highest Rating Lowest Rating Review Length Search Showing reviews based on the current filters. Reset all filters Vendor Sr. What is most valuable. CA Harvest has been one of our primary version control tools. It has helped us to integrate version control with change management. One feature that we are looking for is traceability, and also merging. That is a little cumbersome right now. We had been using multiple solutions across our organization, but we wanted to bring in an enterprise solution, which would be common across all our applications. We had other vendors which we were looking at, but one advantage is that CA came to us with a solution rather than the tool. Aug 11 2019 Powerful UDP functionality with a userfriendly interface What is most valuable. While all of the features are valuable, we use a lot of the UDPs. They normally link to all of the purchases that are being used in a project. Using this solution, we were able to implement a full process for all of our lifecycles. What needs improvement. Technical support for this solution is very good, although they can still use improvement in some regards. Whats my experience with pricing, setup cost, and licensing. The licensing costs for this solution are very reasonable. Once you purchase your licenses, there is maintenance support that is renewed every year. Which solution did I use previously and why did I switch. We did not use another solution prior to this one. What other advice do I have. My advice to anybody who is implementing this solution is to read all of the documentation. We did evaluate other solutions before choosing thing one, including a product from Compuware. It was not up to standard. Updated July 2020. Download now 432,084 professionals have used our research since 2012.
